No jargon, just plain English.

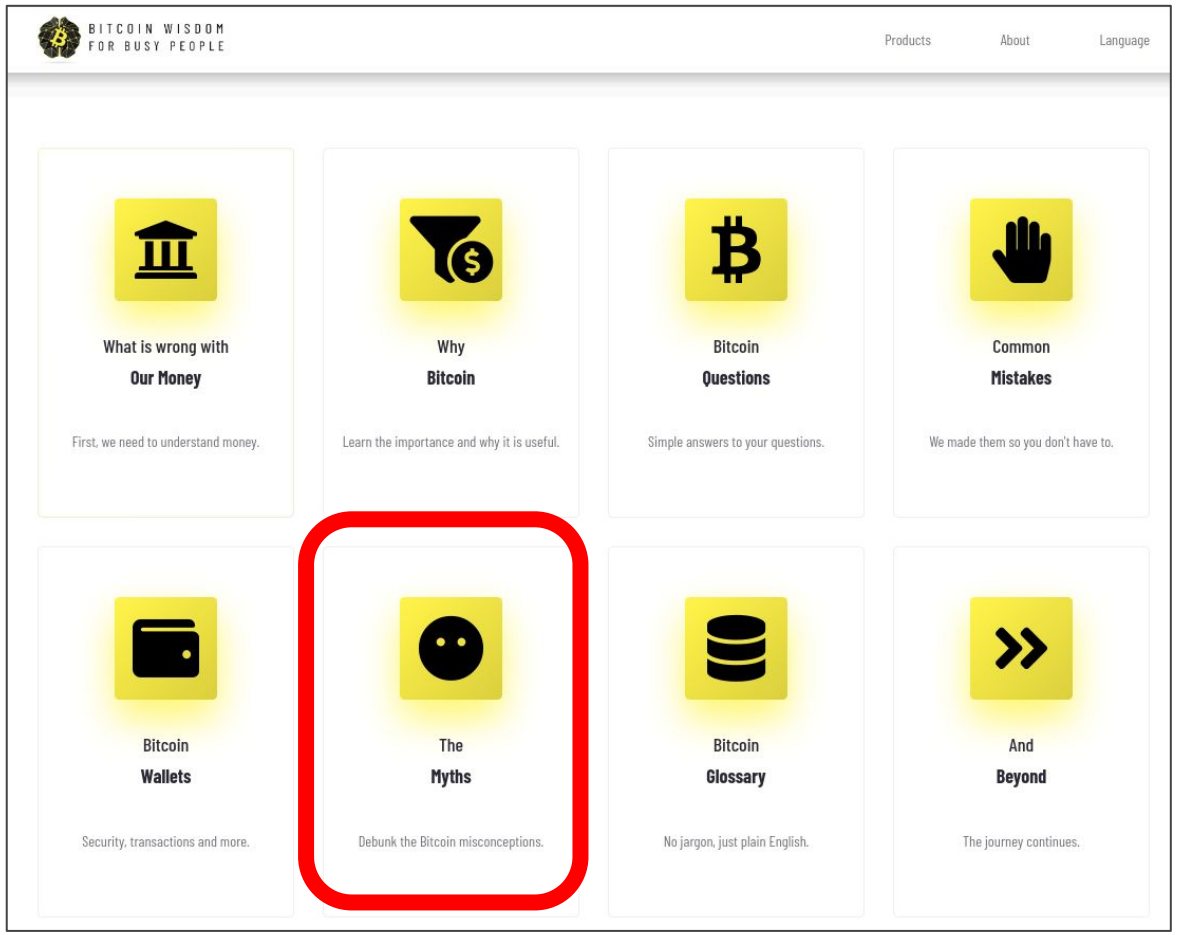
Juan

@stillwater62f on Twitter

An Engineer and Bitcoiner. Doing my part to make this world a better place.

Let’s break some myths

…in a playful way.



- ➔ There isn’t enough Bitcoin for everyone on earth
- ➔ Bitcoin is too slow
- ➔ Bitcoin is too difficult to use

Myth
01

There isn't enough Bitcoin for everyone on earth
(21 million)

Bitcoin units of measurement

bitcoin	= 1 bitcoin
mBit	= 0.001 bitcoin
bit	= 0.000001 bitcoin
finney	= 0.0000001 bitcoin
sat	**= 0.00000001 bitcoin**

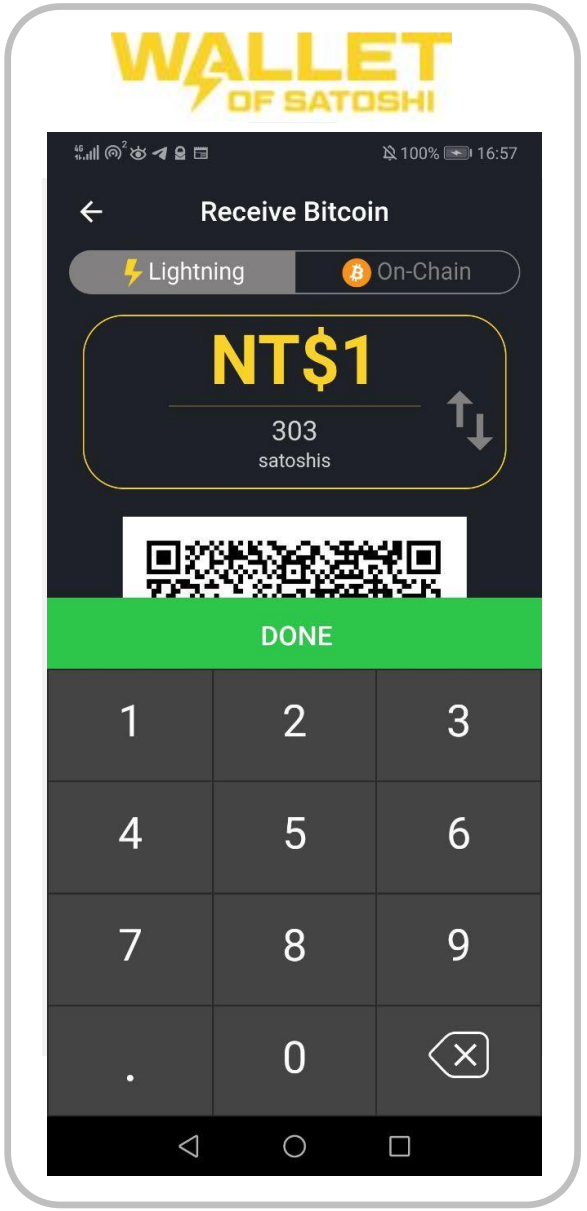
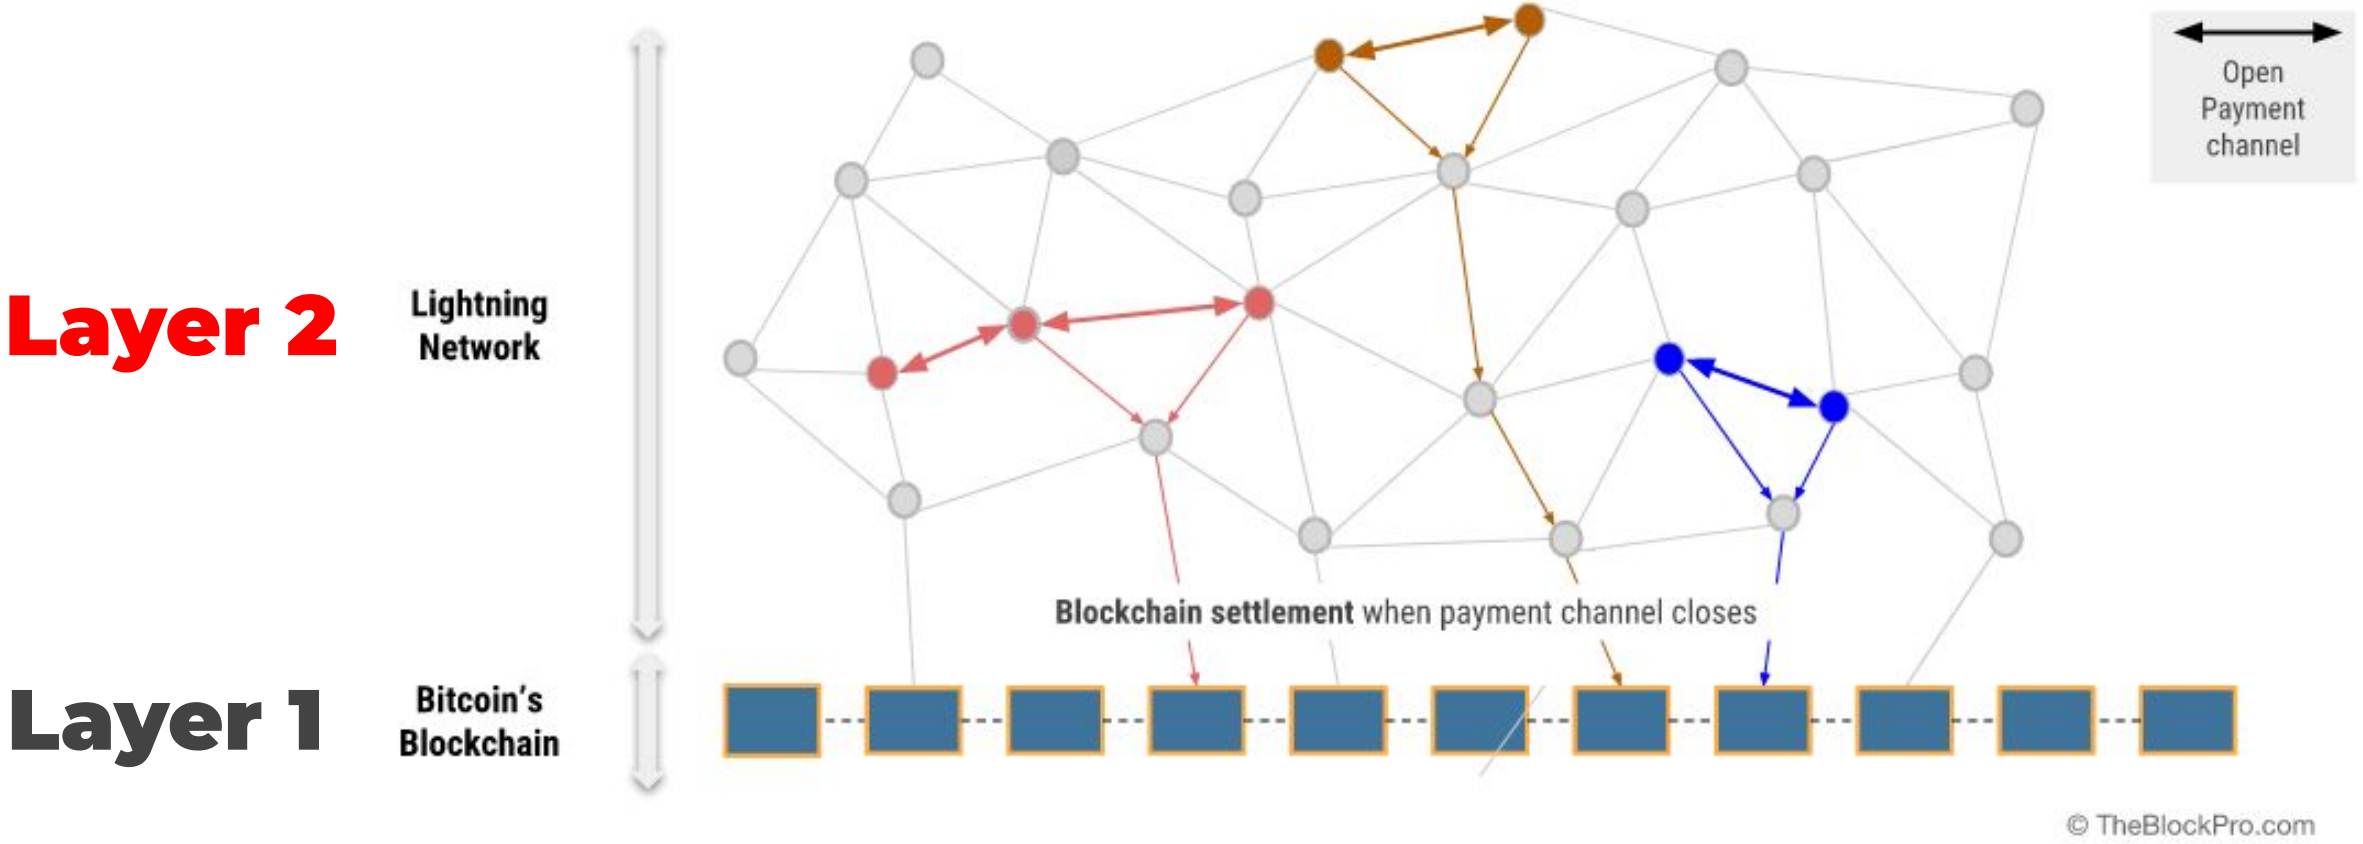
App: Wallet of Satoshi

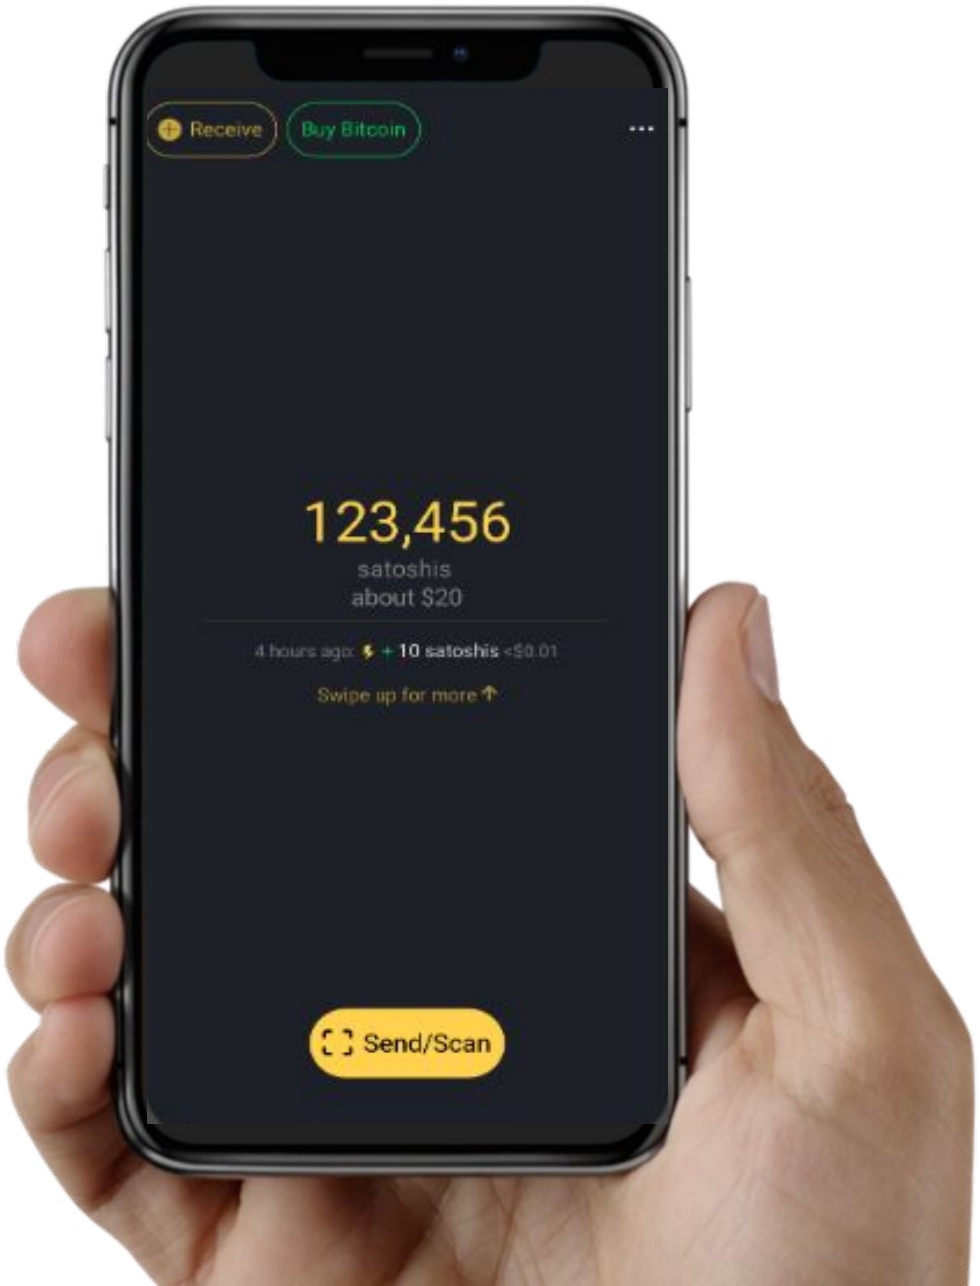


Myth
02

Bitcoin is too slow

The Lightning Network





Wallet of Satoshi
Bitcoin Lightning focused

https://walletofsatoshi.com

PROS

- Simple
- Focused
- Quick setup

CONS

- Only non custodial
- Backup with email | no seed words
- Fixed fee of 0.3% on BTC top ups.

Myth
03

Bitcoin is too difficult to use ?

Let's play & debunk those 3 myths!

Introduce yourself

- ➔ My name
- ➔ A quick fact about me and Bitcoin
- ➔ Something what is not in my CV or Linkedin

Play the wheel

Get your Wallet of Satoshi ready and spin the wheel

Get your Sats

Congratulations!
You won some Bitcoins.

Blue Wallet
Full features Bitcoin Wallet

https://bluewallet.io

PROS

- Open-Source
- Bitcoin & Lightning
- Watch-only

CONS

- Could be too overwhelming for a total beginner.

Some features

https://bluewallet.io/features/

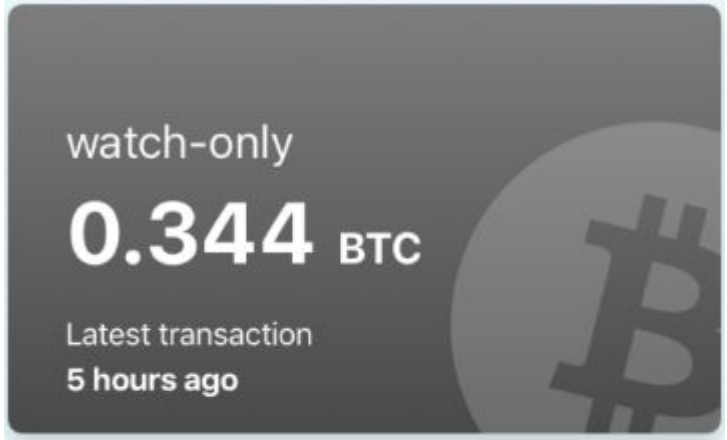
Bluewallet supports various Bitcoin wallet implementations, BIPs and different integrations with external services. These wallets will have different functionality and they serve for different use cases or purposes.

Bitcoin wallet

The main Bitcoin wallet is easily created from the add wallet screen. It is Segwit compatible and a Hierarchical Deterministic wallet, which means that it generates new receiving addresses every time you tap receive, making it more privacy friendly.

Lightning wallet

The Bitcoin Lightning wallet can be used on custodial fashion or non-custodial if you run your own node. This wallet provides the ability to receive lightning out of the box and send payments as well. It is powered by our opensource LNDhub solution.



Watch-only

The watch-only wallet as the name indicates it's a wallet that allows you to keep an eye on your balance and receive transactions without touching your private key. To use it import it to the import wallet option on the create wallet screen.

Thank you!

Let's stay connected.
